DIXON

HIGH PERFORMANCE | ECO-FRIENDLY

Dixon Golf is an Arizona-based company that created the world's first high performance eco-friendly family of golf balls. Established with an innovative mission, Dixon was founded in 2008 to reduce the carbon footprint the game has on our earth. In effort to find a solution to the ***300 million golf balls ending up in landfills each year in the U.S. alone***, many of which contain harmful heavy metals, Dixon Golf introduced a sustainable golf ball that performs to pro standards and is industry approved. Dixon Golf balls are weighted with a heavy earth salt -- a complimentary ingredient found in nature.

In addition to these practices, Dixon Golf strives to remain socially responsible and has contributed more than $1,000,000 to charities nationwide since 2012. As one of the fastest growing golf ball brands in the world, *Global Industry Analysts* recognized Dixon Golf as a "key player" in the 2015 *Global Strategic Business Report*.

As our story continues, we want you to play a role in our evolution... **join the conversation**.

The Dixon family of golf balls is distributed internationally and conforms to USGA and R&A standards.

Furthermore, the ball is made from reprocessable polymers, which allows it to be recycled. Dixon's sustainable mission didn't stop with the product and packaging. In 2014, Dixon Greenovations™ was launched; a program that features recycling and education partners who reuse golf balls as part of its 3-part eco initiative.
