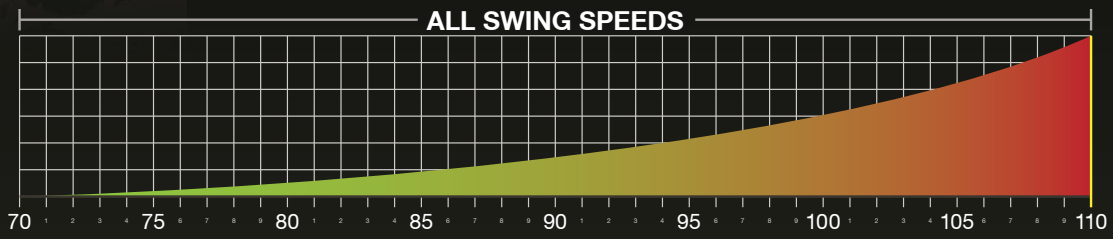
DIXON WIND: EXTREME DISTANCE GOLF BALL

Krank Golf's long drive team, the winners of the 2010 RE/MAX World Long Drive Championship, has endorsed the Dixon Wind golf ball as the longest golf ball they have hit.

- 428 Monster™ dimple pattern for ultimate distance and accuracy
- Resilient Eco-cover™ for maximum durability and spin control
- Densified precast GreenCore™ generates extra recoil for even greater distance

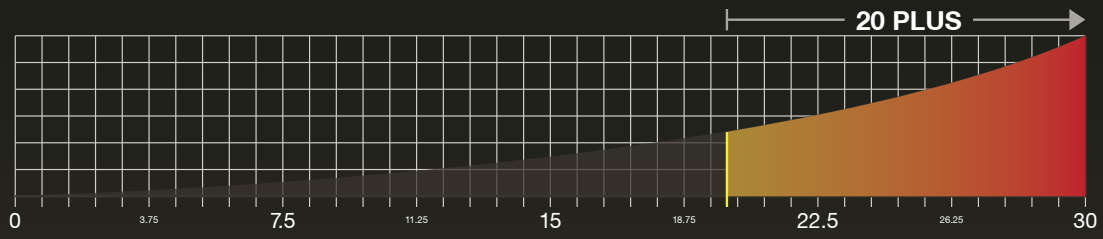
SWING SPEED (MPH)

The Dixon Wind golf ball can be used by golfers of all different swing speeds. Because the Dixon Wind golf ball has a firm cover, it allows the golfer with slower swing speeds to experience extra length off the drive, and with their irons.



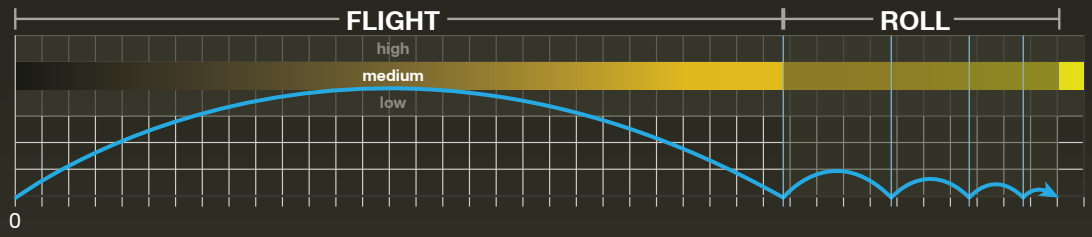
HANDICAP

The Dixon Wind golf ball is designed for golfers with a handicap of 20 +. Because the Dixon Wind golf ball has a firm cover, it is more durable, and results in longer, straighter drives as well.



TRAJECTORY

The Dixon Wind golf ball has medium level trajectory which is suitable for most golfers.



FEEL (COMPRESSION)

The Dixon Wind golf ball has a firm feel. This again allows for a straighter drive, more accurate iron play, and still maintains its durability. If you are looking for a softer feel from your golf ball, we suggest either the Dixon Earth, or Dixon Fire golf balls.

8 IRON SPIN

The Dixon Wind golf ball has a low rate of spin with low iron shots. If you are looking for a golf ball that has more workability around the green, you should consider the Dixon Earth or the Dixon Fire golf balls.
